FETAL BRAIN DETECTION REPORT

Report ID: AIT-FBD-000007
Scan Date: 2026-10-13 15:24:39
Status: Complete

PATIENT RECORD & EXAM DETAILS

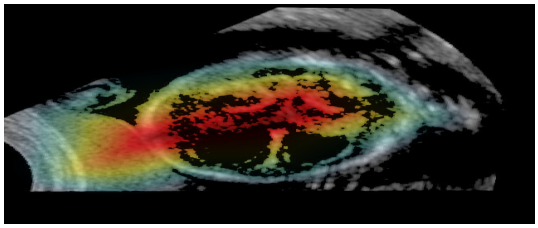

Patient Name:	jane	**Report ID:**	AIT-FBD-000007
Contact Phone:	56236523	**Email Address:**	jane@gmail.com
Project Unit:	Fetal Brain Research Project	**Examination Note:**	995gvg

FETAL BRAIN SCAN & DETECTION FINDINGS

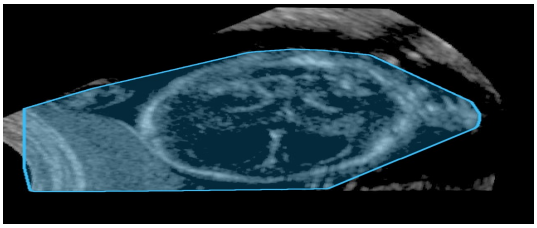

Detected Condition:	**Cerebellah Hypoplasia**
Detection Confidence:	**94.04%** (High Certainty)
Model Architecture:	Swin Transformer
Scan Classification:	**ANOMALY DETECTED • CEREBELLAH HYPOPLASIA**

ATTENTION HEATMAP & ANOMALY SEGMENTATION

Grad-CAM Saliency Heatmap (Attention Localization)

Anomaly Pattern Segmentation (Lesion Delineation)

OBSERVATION SUMMARY & RECOMMENDATIONS

Summary: The research model identified features consistent with **Cerebellah Hypoplasia** (confidence: **94.04%**). Findings should be correlated with comprehensive sonographic assessment.

Recommendations:

- Detailed ultrasound target scan recommended for confirmation.
- Multi-disciplinary clinical evaluation and specialist counselling.

VERIFICATION & RESEARCH REVIEW

System: Fetal Brain Detection System
Verification Code: VER-AIT-000007-X
Digitally generated by Fetal Brain Detection System
